

Brainstorm & Prioritize Ideas

Brainstorming Ideas:

Gather a diverse group of stakeholders, including teachers, administrators, and IT professionals, for brainstorming sessions. Encourage open discussion and idea generation on how the CRM can improve result tracking. Explore features like automated data entry, real-time updates, progress dashboards, and communication tools.

Prioritization Process:

Prioritize ideas based on impact and feasibility. Consider which features will have the most significant positive effect on the result tracking process. Conduct surveys or gather feedback to gauge which ideas are most important to users. Balance immediate needs with long-term goals and the available budget.

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP

Add sub-points to sticky notes to make it easier to find, remove, organize, and categorize important ideas as you go along with your ideas.

How can the CRM be integrated with other systems, such as learning management systems (LMS) and student information systems (SIS)

How can the CRM be used to provide better feedback and support to candidates?
