

Naan Mudhalvan
Salesforce Developer(Course)
Assignment No 1 to 4

Name : Srimythili S P

Naan Mudhalvan id : au620120104099
Year & Dep : 4th year & CSE

Batch : 2024
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College_C" and "C Department_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

The screenshot shows the 'New Custom Object' page in the Salesforce Setup. The 'Label' field is set to 'college' and the 'Plural Label' is set to 'Colleges'. The 'Record Name' field is set to 'college Name'. Other settings include 'Allow Bulk API Access' and 'Allow Streaming API Access' checked under 'Object Classification'. The 'Deployment Status' is set to 'Deployed'. The 'Search Status' is checked. Under 'Object Creation Options', 'Add Notes and Attachments related list to default page layout' is checked. The page includes standard Salesforce navigation and save buttons.

Second custom objects, let's call them "Department_C"

Setup | Home | Object Manager

Object Manager

New Custom Object

Help for this Page [?](#)

Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label:	<input type="text" value="department"/>	Example: Account
Plural Label:	<input type="text" value="departments"/>	Example: Accounts
Starts with vowel sound:	<input type="checkbox"/>	

The Object Name is used when referencing the object via the API.

Object Name:	<input type="text" value="department"/>	Example: Account
--------------	---	------------------

Description:

Context-Sensitive Help Setting

<input checked="" type="radio"/> Open the standard Salesforce.com Help & Training window
<input type="radio"/> Open a window using a Visualforce page

Content Name:

Record Name: Example: Account Name

Data Type:

Optional Features

Allow Reports
 Allow Activities
 Track Field History
 Allow in Chatter Groups
 Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more](#).

Allow Sharing
 Allow Bulk API Access
 Allow Streaming API Access

Deployment Status

[What is this?](#)

In Development
 Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more](#).

Allow Search

Object Creation Options (Available only when custom object is first created)

Add Notes and Attachments related list to default page layout
 Launch New Custom Tab Wizard after saving this custom object

Buttons: Save | Save & New | Cancel

Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College__c" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.
5. Choose "Master-Detail Relationship" as the data type.
6. Enter a label for the relationship, e.g., "Department __c."
7. Choose " Department__c" as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.

10. Click "Next" and "Save" to create the relationship.

The image contains two screenshots of the Salesforce Setup interface, illustrating the process of creating a Master-Detail relationship between the College__c and CDepartment objects.

Screenshot 1: Object Manager - CDepartment

This screenshot shows the 'Object Manager' page for the 'CDepartment' object. The left sidebar lists various configuration tabs: Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, Flow Triggers, and Validation Rules. The main panel displays the 'Details' section for the 'CDepartment' object, which includes fields for Description, API Name (set to 'CDepartment__c'), Singular Label ('CDepartment'), Plural Label ('CDepartments'), and several status and history fields. At the top right of the main panel are 'Edit' and 'Delete' buttons.

Screenshot 2: New Relationship - Step 3 of 6

This screenshot shows the 'New Relationship' wizard, Step 3 of 6. It is titled 'Step 3. Enter the label and name for the lookup field'. The left sidebar is identical to the previous screenshot. The main panel contains fields for 'Field Label' (set to 'college'), 'Field Name' (set to 'college'), 'Description', and 'Help Text'. Below these fields are sections for 'Child Relationship Name' (set to 'CDepartments') and 'Sharing Setting'. Under 'Sharing Setting', there are two radio buttons: 'Read Only' (selected) and 'ReadWrite'. A note states: 'Select the minimum access level required on the Master record to create, edit, or delete related Detail records.' Under 'ReadWrite', it says: 'Allows users with at least ReadWrite access to the Master record to create, edit, or delete related Detail records.' There are also checkboxes for 'Allow reparenting' (unchecked), 'Auto add to custom report type' (unchecked), 'Child records can be reparented to other parent records after they are created' (unchecked), and 'Add this field to existing custom report types that contain this entry' (checked). At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

The top screenshot shows the 'New Relationship' wizard for the 'CDepartment' object. Step 2, 'Choose the related object', is displayed with 'college' selected in the 'Related To' dropdown. The bottom screenshot shows the 'New Custom Field' wizard for 'CDepartment'. Step 1, 'Choose the field type', is shown with the 'Roll Up Summary' option selected under 'Data Type'.

Step 3: Create the Roll-Up Summary Field

Now, let's create a Roll-Up Summary Field on the "College_C" to calculate the total number of related records in "Department_C":

1. Still on the "College_c" settings, go to "Fields & Relationships."
2. Click the "New" button to create a new custom field.
3. Choose "Roll-Up Summary" as the data type.
4. Enter a label for the field, e.g.,
5. Choose "Count" as the Roll-Up Type.
6. Select "Department_c" as the object to roll up information from.
7. Specify the filter criteria if you want to filter the related records.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.

10. Click "Next" and "Save" to create the Roll-Up Summary Field.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
college	college__c	Master-Detail(college)		✓
Created By	CreatedById	Lookup(User)		
Department Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		

Action	Label	Tab Style	Description
Edit Del	Book1	Box	
Edit Del	Research Proposal	Square	
Edit Del	student	Box	

Field Label	Total count
Data Type	Roll-Up Summary
Field Name	Total_count
Description	

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout.

Add Field Page Layout Name
 college Layout

When finished, click Save & New to create more custom fields, or click Save if you are done.

New Custom Field

Step 2. Enter the details Step 2 of 5

Field Label:	Total count
Field Name:	Total_count
Description:	(empty)
Help Text:	(empty)

Auto add to custom report type: Add this field to existing custom report types that contain this entity

Setup > OBJECT MANAGER college

college New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type

Select one of the data types below.

<input type="radio"/> None Selected	
<input type="radio"/> Auto Number	A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
<input type="radio"/> Formula	A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
<input checked="" type="radio"/> Roll Up Summary	A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
<input type="radio"/> Lookup Relationship	Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
<input type="radio"/> Master-Detail Relationship	Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where: <ul style="list-style-type: none"> The relationship field is required on all detail records. The ownership and sharing of a detail record are determined by the master record. When a user deletes the master record, all detail records are deleted. You can create rollup summary fields on the master record to summarize the detail records. The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.
<input type="radio"/> External Lookup Relationship	Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
<input type="radio"/> ...	Allows users to select a True (checked) or False (unchecked) value.

Step 1

[Next](#) [Cancel](#)

Setup > OBJECT MANAGER college

Fields & Relationships

4 Items, Sorted by Field Label

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
college Name	Name	Text(80)		✓

Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User Group)		✓

Step 4: Create a Lightning App

1. Type and select "App Manager."
2. Click "New Lightning App."
3. Fill in basic information (Name, Developer Name, Description).
4. Choose the App Type (Standard, Console, Custom).
5. Customize the Logo and Colour Scheme.
6. Configure Navigation Items (objects to appear in the app's menu).
7. Set the App Visibility (default access).
8. Optionally, choose Record Pages (Lightning Record Pages).
9. Review and Save the app.

10. Assign the app to users or profiles.

11. Test the app with the assigned users.

The screenshot shows the Salesforce Setup interface with the 'Tabs' tab selected under 'User Interface'. The main content area displays the 'New Custom Object Tab' configuration screen. At the top, it says 'Step 2. Add to Profiles' and 'Step 2 of 3'. It includes a note: 'Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile.' There are two radio button options: 'Apply one tab visibility to all profiles [Default On]' (selected) and 'Apply a different tab visibility for each profile'. A table lists various user profiles on the left and their corresponding 'Tab Visibility' settings on the right. Most profiles have 'Default On' selected. At the bottom right, there are 'Previous', 'Next', and 'Cancel' buttons.

The screenshot shows the Salesforce Setup interface with the 'Tabs' section selected. The main title is 'New Custom Object Tab'. The sub-step is 'Step 1. Enter the Details'. The user has selected the object 'college' and chosen the tab style 'Jewel'. There is a note about choosing a splash page custom link, which is currently set to 'None'. A description field is present but empty. Navigation buttons 'Next' and 'Cancel' are at the bottom right.

The screenshot shows the 'Step 3. Add to Custom Apps' page. It lists various custom apps and standard objects that can be included in the new tab. Most items have a checked checkbox next to them. A specific note at the bottom says 'Append tab to users' existing personal customizations'. Navigation buttons 'Previous', 'Save', and 'Cancel' are at the bottom right.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Cancel Save & New Save

The screenshot shows a web-based application interface. At the top, there is a navigation bar with links for "My college", "colleges", "CDepartments", "student", and "Content". A search bar is located at the top right. Below the navigation, a header bar displays "CDepartments Recently Viewed" with a refresh icon. A message indicates "1 item • Updated a few seconds ago". The main content area shows a table with one row, labeled "Department Name" and containing the value "cse". On the far right of the table are standard edit and delete icons. The bottom of the screen features a toolbar with various icons.

① History

This screenshot shows a "New CDepartment" form overlaid on the previous list view. The title "New CDepartment" is at the top. A note "To unpin, pin another list view" is visible above the form. The form itself has a section titled "Information" with the following fields:

- * Department Name: information technology
- * college: kiot
- email: it@gmail.com
- phone: 897577568
- hod name: arul
- about: (empty text area)

At the bottom of the form are three buttons: "Cancel", "Save & New", and "Save". The background shows the same list view of departments as the first screenshot.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for User A and one for User B.

The image consists of two vertically stacked screenshots of the Salesforce Setup Profiles page. Both screenshots show a list of profiles with columns for Action, Profile Name, User License, and Custom status.

Screenshot 1 (Top): This screenshot shows the creation of the 'Chatter External User' profile. The 'Custom' column for this profile is checked. Other profiles listed include Analytics Cloud Integration User, Analytics Cloud Security User, Authenticated Website, Chatter Free User, Chatter Moderator User, Contract Manager, Cross Org Data Proxy User, Custom Marketing Profile, Custom Sales Profile, Custom Support Profile, Customer Community Login User, Customer Community Plus Login User, Customer Community Plus User, Customer Community User, and Customer Portal Manager Custom. The 'Custom' column for most of these is unchecked, except for the 'Custom Marketing Profile' which has a checked checkbox.

Action	Profile Name	User License	Custom
<input type="checkbox"/>	Analytics Cloud Integration User	Analytics Cloud Integration User	<input type="checkbox"/>
<input type="checkbox"/>	Analytics Cloud Security User	Analytics Cloud Integration User	<input type="checkbox"/>
<input type="checkbox"/>	Authenticated Website	Authenticated Website	<input type="checkbox"/>
<input type="checkbox"/>	Authenticated Website	Authenticated Website	<input type="checkbox"/>
<input type="checkbox"/>	Chatter External User	Chatter External	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Chatter Free User	Chatter Free	<input type="checkbox"/>
<input type="checkbox"/>	Chatter Moderator User	Chatter Free	<input type="checkbox"/>
<input type="checkbox"/>	Contract Manager	Salesforce	<input type="checkbox"/>
<input type="checkbox"/>	Cross Org Data Proxy User	XOrg Proxy User	<input type="checkbox"/>
<input type="checkbox"/>	Custom Marketing Profile	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Custom Sales Profile	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Custom Support Profile	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Customer Community Login User	Customer Community Login	<input type="checkbox"/>
<input type="checkbox"/>	Customer Community Plus Login User	Customer Community Plus Login	<input type="checkbox"/>
<input type="checkbox"/>	Customer Community Plus User	Customer Community Plus	<input type="checkbox"/>
<input type="checkbox"/>	Customer Community User	Customer Community	<input type="checkbox"/>
<input type="checkbox"/>	Customer Portal Manager Custom	Customer Portal Manager Custom	<input type="checkbox"/>

Screenshot 2 (Bottom): This screenshot shows the creation of the 'Salesforce API Only System Integrations' profile. The 'Custom' column for this profile is checked. Other profiles listed include salesmanager, Silver Partner User, Solution Manager, Standard Platform User, Standard User, and System Administrator. The 'Custom' column for most of these is checked, except for the 'Standard User' which has an unchecked checkbox.

Action	Profile Name	User License	Custom
<input type="checkbox"/>	Salesforce API Only System Integrations	Salesforce Integration	<input type="checkbox"/>
<input type="checkbox"/>	salesmanager	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Silver Partner User	Silver Partner	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Solution Manager	Salesforce	<input type="checkbox"/>
<input type="checkbox"/>	Standard Platform User	Salesforce Platform	<input type="checkbox"/>
<input type="checkbox"/>	Standard User	Salesforce	<input type="checkbox"/>
<input type="checkbox"/>	System Administrator	Salesforce	<input type="checkbox"/>

The screenshot shows the Salesforce Setup interface with the 'Profiles' tab selected. On the left, the navigation sidebar includes 'Setup Home', 'Service Setup Assistant', 'Multi-Factor Authentication Assistant', 'Hyperforce Assistant', 'Release Updates', 'Lightning Experience Transition Assistant', 'Salesforce Mobile App', 'Lightning Usage', 'Optimizer', and 'ADMINISTRATION' sections with 'Users', 'Permission Set Groups', 'Permission Sets', and 'Profiles' sub-sections. The 'Profiles' sub-section is currently active. The main content area displays the 'Clone Profile' page, which prompts the user to enter the name of the new profile and specifies that an existing profile must be selected to clone from. The 'Profile Name' field contains the placeholder 'Salesforce Platform'. A note at the top right indicates that the 'Profile Name' field is required information.

This screenshot is identical to the one above, but the 'Profile Name' field now contains the text 'Manager'. All other elements, including the sidebar navigation and the main page content, remain the same.

Help for this Page

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** The top navigation bar includes tabs for WhatsApp, Salesforce Developer Session 2, Top Hits 2023, Profiles | Salesforce, and Welcome to Salesforce: Verify your account.
- Left Sidebar:** The sidebar under the "Setup" tab lists various administrative sections: Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, Administration, Users, Permission Set Groups, Permission Sets, Profiles (which is currently selected), Public Groups, Queues, Roles, User Management Settings, and Users.
- Current Page:** The main content area is titled "Profiles" under the "SETUP" section. It shows a profile named "salesmanage" being edited. The profile details are as follows:
 - Name:** salesmanage
 - User License:** Salesforce Platform
 - Description:** (Empty text box)
 - Custom Profile:** A checked checkbox.
- Custom App Settings:** This section lists app settings for the "salesmanage" profile. The "kiot (kiot)" app is set to be visible and default. Other apps like Analytics Studio and App Launcher are listed but not selected.
- Service Provider Access:** This section is partially visible below the app settings.
- Tab Settings:** At the bottom, there is a section for "Standard Tab Settings" where the "Learning" tab is set to "Default On".

The screenshot shows the Salesforce Setup interface for managing Profiles. The left sidebar is titled 'Setup' and includes sections for 'Quick Find', 'Setup Home', 'Service Setup Assistant', 'Multi-Factor Authentication Assistant', 'Hyperforce Assistant', 'Release Updates', 'Lightning Experience Transition Assistant', 'Salesforce Mobile App', 'Lightning Usage', and 'Optimizer'. Under 'ADMINISTRATION', the 'Profiles' section is selected and highlighted in blue. The main content area is titled 'SETUP Profiles' and contains several configuration sections:

- Contact Front Limits**: A row of checkboxes for 'User External Credentials'.
- Custom Object Permissions**: A grid showing permissions for 'Bank' and 'customers' objects across 'Basic Access' and 'Data Administration' categories.
- Session Settings**: Set 'Session Times Out After' to '2 hours of inactivity' and 'Session Security Level Required at Login' to 'None'.
- Password Policies**: Configuration for password expiration, history, length, complexity, and other security requirements.

<https://artificialintelligence-d-dev-ed.develop.lightning.force.com/one/one.app#/setup/PermSets/home>

Step 2:

Permission Sets:

- Create two permission sets, one for User A and one for User B.

Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with user B.
- For the sharing rule criteria, specify that records owned by User A are shared with user A, and records owned by User B are shared with User B.

Ownership:

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot access each other's records.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' page open. The left sidebar is collapsed, showing sections like 'User Management Settings', 'Feature Settings', 'Data.com', 'Service', 'Embedded Service', and 'User Interface'. The main content area has a header 'Permission Sets' with a 'SETUP' icon. Below it is a sub-header 'Permission Sets' with a note: 'On this page you can create, view, and manage permission sets.' A sub-header 'All Permission Sets' includes links for 'Edit', 'Delete', and 'Create New View'. A search bar at the top right contains the placeholder 'Search Setup'. The main table lists 29 permission sets, each with columns for 'Action', 'Permission Set Label', 'Description', and 'License'. The table includes rows for various roles like 'Buyer', 'CRM User', 'Commerce Admin', 'Contact Center Admin', 'Contact Center Agent', 'Contact Center Supervisor', 'Experience Profile Manager', 'Facility Manager', 'Field Service Mobile', 'Merchandiser', 'Order Management Agent', 'Order Management Operations Manager', and 'Order Management Shopper'. The 'Description' column provides details for each role, such as 'Allows access to the store. Lets users see products and categories...' for the 'Buyer' role. The 'License' column indicates the specific license required for each role, such as 'B2B Buyer Permission Set One Seat' for the 'Buyer' role. The bottom of the page shows pagination with '1-29 of 29' and '0 Selected'.

madhu b	salesmanage			Salesforce Platform	Never Expires

Cancel Back Assign

The screenshot displays two overlapping Salesforce windows. The top window is titled 'Assignment Summary' and shows a table with one row of data:

Full Name	User License	Expires On	Time Zone	Status
madhu b	Salesforce Platform			<input checked="" type="checkbox"/> Success

A green banner at the top of this window indicates '1 assignments were successful.' The bottom window shows a 'Recently Viewed' list for the 'customers' object. The list is currently empty, displaying the message: 'You haven't viewed any customers recently. Try switching list views.' A context menu is open on the right side of the list, titled 'LIST VIEW CONTROLS', with options including 'New', 'Clone', 'Rename', 'Sharing Settings', 'Show List Filters', 'Select Fields to Display', and 'Delete'. The URL in the browser bar is https://artificialintelligence-d-dev-ed.lightning.force.com/lightning/o/customer__c/list?filterName=Recent.

3.. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

Solution:

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per. Setup-quick search[profile]

The screenshot shows the Salesforce Setup interface under the Profiles section. The left sidebar includes options like Public Groups, Queues, Roles, User Management Settings, and a Prospector Users section. The main content area displays a table of profiles with columns for Action, Profile Name, User License, and Status (Custom). The table lists various profiles such as Analytics Cloud Integration User, Authenticated Website, Chatter External User, etc. A navigation bar at the bottom indicates 'Page 1 of 2'.

Step 2:

Click on the new to create a new profile along with the label and Api

The screenshot shows the 'Clone Profile' dialog box. It prompts the user to enter the name of the new profile and states 'You must select an existing profile to clone from.' The 'Existing Profile' dropdown is set to 'Standard Platform User'. The 'User License' is listed as 'Salesforce Platform' and the 'Profile Name' is entered as 'Jaga'. At the bottom are 'Save' and 'Cancel' buttons.

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

Step 3:

Now click on the edit and scroll down to custom object settings and enable the read,create,edit and view options. After that click on save.

The screenshot shows the Salesforce Setup interface under the Profiles section. On the left, the navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main content area displays 'Profile Jaga' with a list of permissions and page layout assignments. The 'Page Layouts' section shows various standard object layouts assigned to different profiles like Global, Order, and Payment.

The screenshot shows the Salesforce Setup interface under the Profiles section. The main content area displays 'Custom Object Permissions' and 'Session Settings'. Under 'Custom Object Permissions', there are two tables for 'Basic Access' and 'Data Administration' for 'Providers' and 'Resources'. Under 'Session Settings', it shows session times out after 2 hours of inactivity and session security levels required at login.

Service Provider Access

Tab Settings

Overwrite users' personal tab customizations

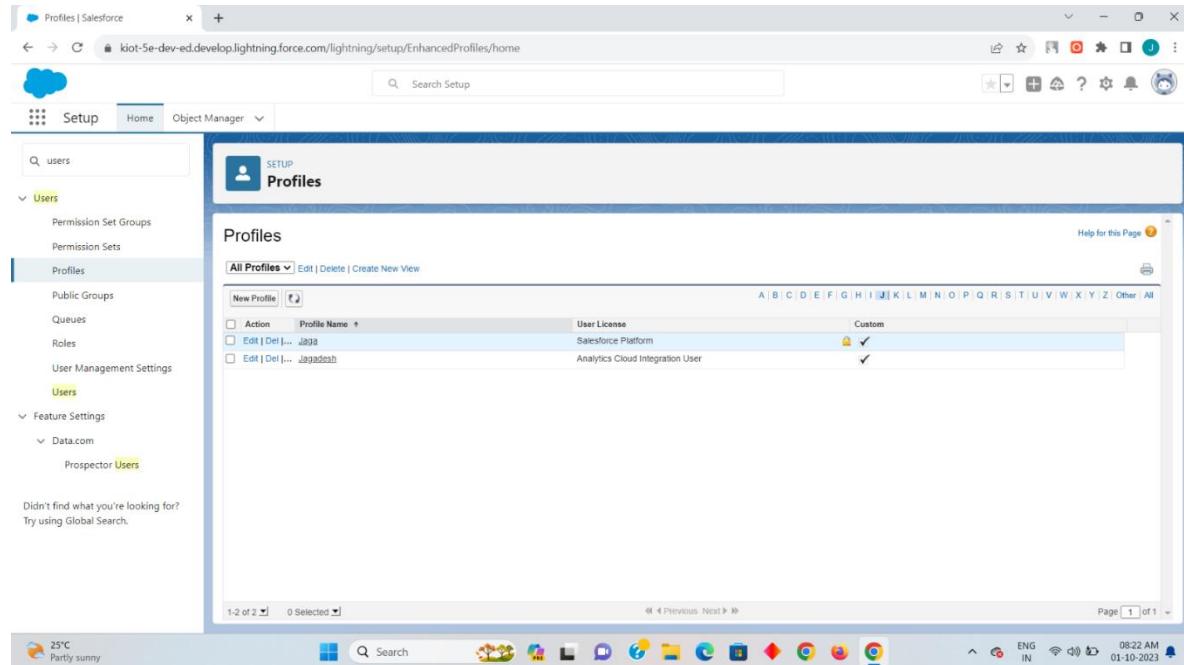

25°C Partly sunny

ENG IN 08:21 AM 01-10-2023

The screenshot shows the 'Profile Edit' page for the 'Jaga' profile. The top has tabs for 'Save', 'Save & New', and 'Cancel'. It includes fields for 'Name' (Jaga), 'User License' (Salesforce Platform), and 'Description'. A 'Custom Profile' checkbox is checked. Below is a 'Custom App Settings' section with two tables for app visibility and default status. The first table includes Analytics Studio, App Launcher, and Hive App. The second table includes Platform and WDC. At the bottom are sections for 'Service Provider Access' and 'Tab Settings', with a checkbox for overwriting user tab customizations. The status bar at the bottom shows weather (25°C, Partly sunny), language (ENG IN), time (08:21 AM), and date (01-10-2023).

Step 4

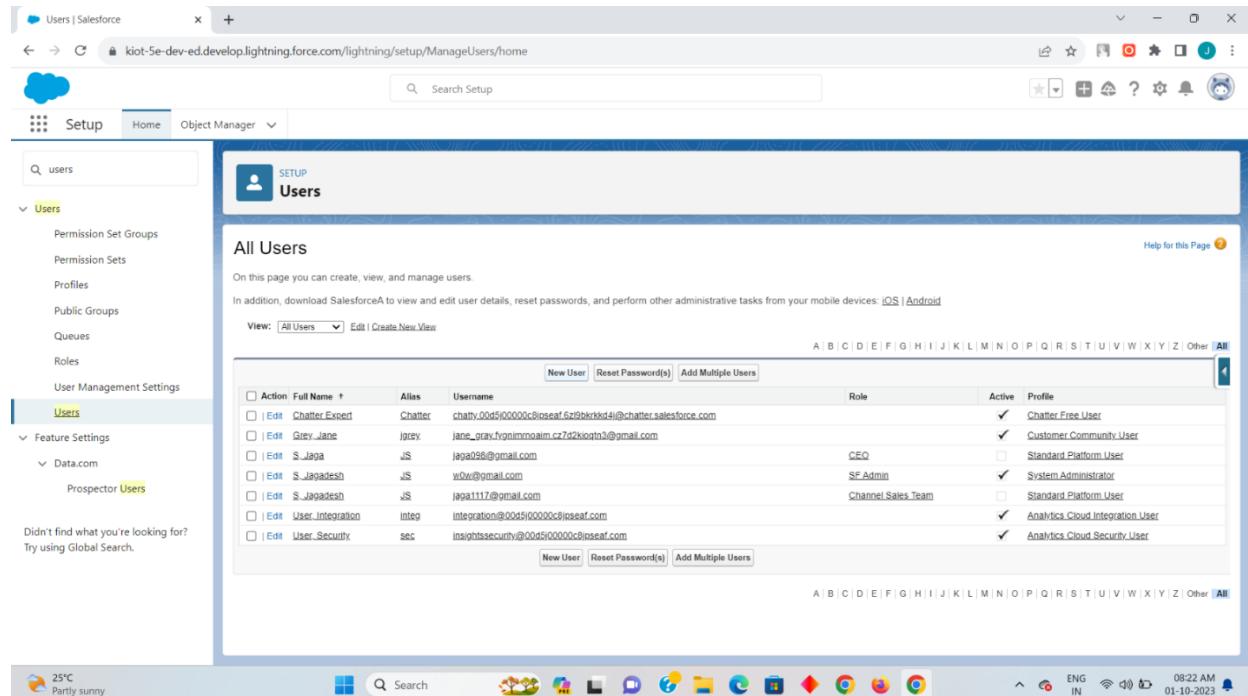

Now you can preview your created profile on the profile option here my profile name jaga has been created with the access of read,create,edit along with view on it

The screenshot shows the Salesforce Setup interface under the Profiles section. The left sidebar is expanded to show 'Users' and its sub-options: Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Users. Under 'Users', there is a note: 'Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'Profiles' and shows a table of profiles. The table includes columns for Action, Profile Name, User License, and Custom. Two profiles are listed: 'Edit [Def... Jaga' (User License: Salesforce Platform, Custom checked) and 'Edit [Def... Jagadeesh' (User License: Analytics Cloud Integration User, Custom checked). The bottom of the page shows navigation links for '1 of 2' and '0 Selected', and a status bar at the bottom right indicating '08:22 AM 01-10-2023'.

Step 5:

Now create two users by enter into the Setup-quick search[user] and then click on new user after clicking that you need to create two user along with the profile as Jaga which we have created on the step 2.once the one user has been created click on the save&new so that you can create the second user and there the user name can been created with alternate name but with the same user profile and once the two user are create click on save.

The screenshot shows the Salesforce Setup interface under the Users section. The left sidebar is expanded to show 'Users' and its sub-options: Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Users. Under 'Users', there is a note: 'Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'All Users' and shows a table of users. The table includes columns for Action, Full Name, Alias, Username, Role, Active, and Profile. Seven users are listed: 'Chatter_Expert' (Alias: Chatter, Username: chatter_00d500000c0iseaf, Role: CEO, Active: checked, Profile: Chatter Free User), 'Grey_Jane' (Alias: jgrey, Username: jane_gray.ygnimmoain_cz7d2koght3@gmail.com, Role: SF Admin, Active: checked, Profile: Customer Community User), 'S.Jaga' (Alias: JS, Username: jaga056@gmail.com, Role: Channel Sales Team, Active: checked, Profile: System Administrator), 'S.Jagadeesh' (Alias: JS, Username: w0w@gmail.com, Role: Channel Sales Team, Active: checked, Profile: Standard Platform User), 'User_Integration' (Alias: Integ, Username: integration@00d500000c0iseaf.com, Role: Channel Sales Team, Active: checked, Profile: Analytics Cloud Integration User), and 'User_Security' (Alias: sec, Username: insightssecurity@00d500000c0iseaf.com, Role: Channel Sales Team, Active: checked, Profile: Analytics Cloud Security User). The bottom of the page shows navigation links for '1 of 2' and '0 Selected', and a status bar at the bottom right indicating '08:22 AM 01-10-2023'.

Now you can preview your two user that you have created in my side I had create the two users a Jagadesh11 and Jagadesh22 as a director channel sales with the marketing team.

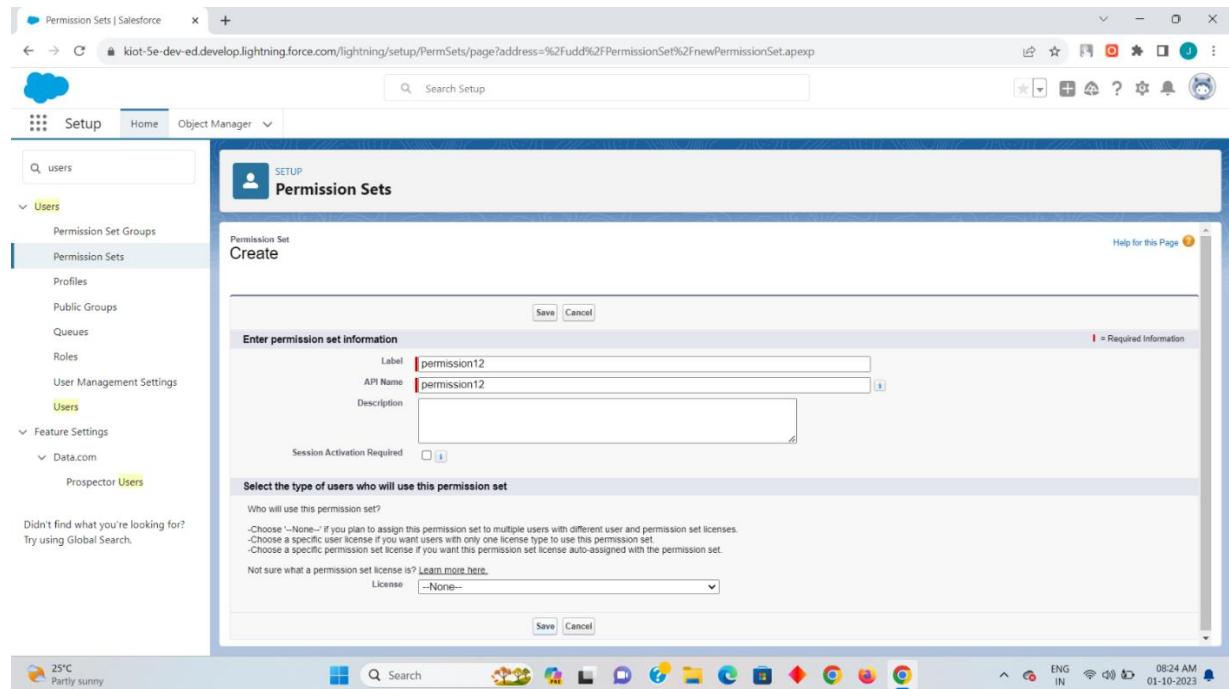

Step 6:

Now the two user as been created with the profile so that two user can perform the Create, Read, Edit and view on both the user. So as per the given task we need to allocate a specific access as delete on one user for that we need create a permission set for one user so it can created as

setup-quick search[permission set]-new-fill label name [auto select the API name]-click on save-object settings-accounts.

The screenshot shows the 'Permission Sets' page in the Salesforce setup. The left sidebar is expanded to show 'Users' and 'Permission Set Groups'. Under 'Permission Set Groups', 'Permission Sets' is selected. The main area displays a table of existing permission sets, each with a checkbox, an action column (Clone), a label column (e.g., 'Buyer', 'CRM User', 'Commerce Admin'), a description column, and a 'License' column. The table includes links for 'Edit', 'Delete', and 'Create New View'. A navigation bar at the bottom shows 'Page 1 of 2'.

The screenshot shows the 'Create' page for a new permission set. The left sidebar is identical to the previous screenshot. The main area has a form titled 'Enter permission set information'. It includes fields for 'Label' (set to 'permission12'), 'API Name' (set to 'permission12'), 'Description' (empty), and 'Session Activation Required' (unchecked). Below this is a section titled 'Select the type of users who will use this permission set'. It contains a note about choosing a license type and a dropdown menu for 'License' (set to '-None-'). At the bottom are 'Save' and 'Cancel' buttons.

ENG IN 08:25 AM 01-10-2023

Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

The screenshot shows the Salesforce Setup interface for managing Permission Sets. The left sidebar is collapsed, and the main area displays the 'Permission Sets' page for a permission set named 'permission12'. The 'Object Settings' dropdown is set to 'Accounts'. In the 'Object Permissions' section, the 'Delete' checkbox is checked under the 'Enabled' column. In the 'Field Permissions' section, the 'Delete' checkbox is checked under the 'Edit Access' column for the 'Account' field. The status bar at the bottom indicates it's 08:25 AM on 01-10-2023.

Step 8

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

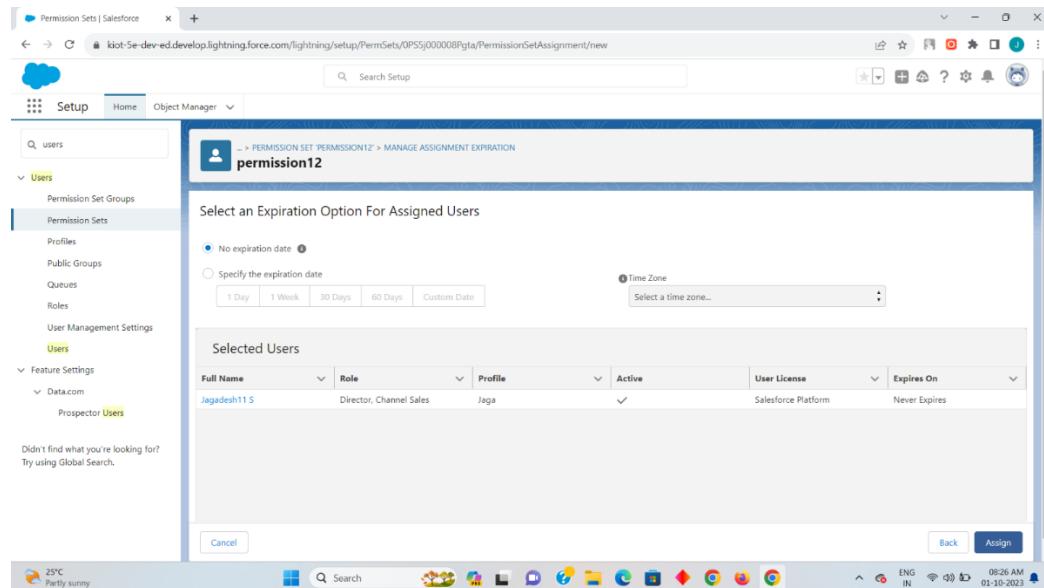

The image consists of three vertically stacked screenshots of the Salesforce setup interface, showing the process of assigning users to a permission set.

Screenshot 1: Current Assignments
The first screenshot shows the "Current Assignments" page for a permission set named "permission12". The interface includes a search bar, a sidebar with navigation links like Setup, Home, Object Manager, and a main area titled "Current Assignments" with a decorative background illustration of a cactus and clouds. A message at the bottom states "No assignments defined."

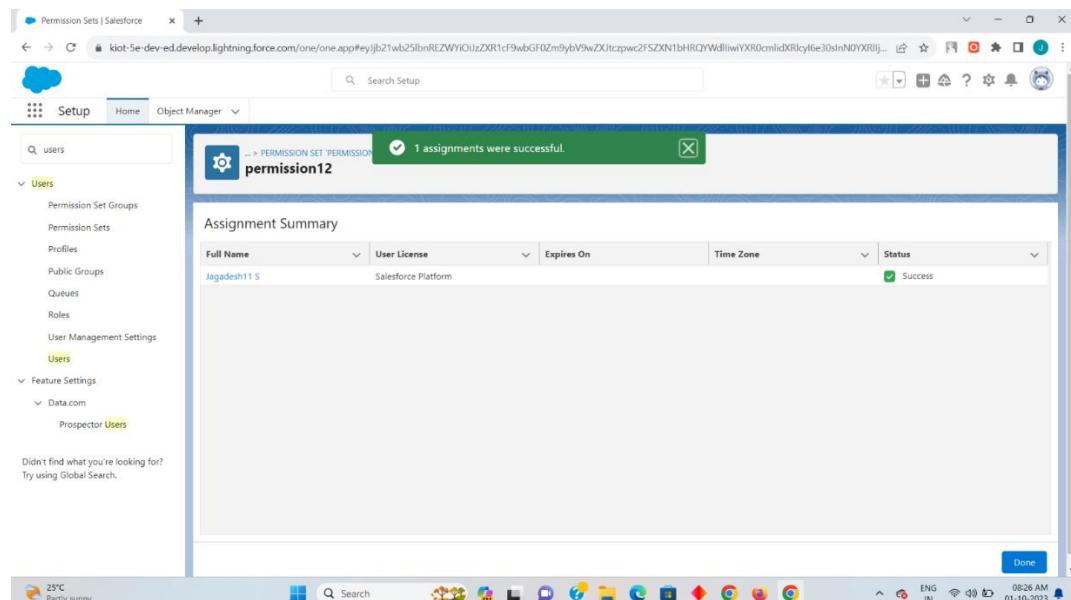

Screenshot 2: Select Users to Assign
The second screenshot shows the "Select Users to Assign" step of the assignment process. It displays a list of "All Users" with columns for Full Name, Alias, Username, Role, Active, and Profile. A search bar at the top right contains the text "jagadesh". A tooltip message above the search bar reads: "Roles, Alias, and Profile aren't searchable. Use filters or sort on these fields instead." The list includes four users: Jagadesh S, Jagadesh S, Jagadesh11 S, and Jagadesh22 S.

Screenshot 3: Select Users to Assign (with selection)
The third screenshot shows the same "Select Users to Assign" step, but with the user "Jagadesh11 S" selected, indicated by a checked checkbox in the "Active" column. The rest of the interface remains the same, including the search bar and the list of users.

Click on next.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

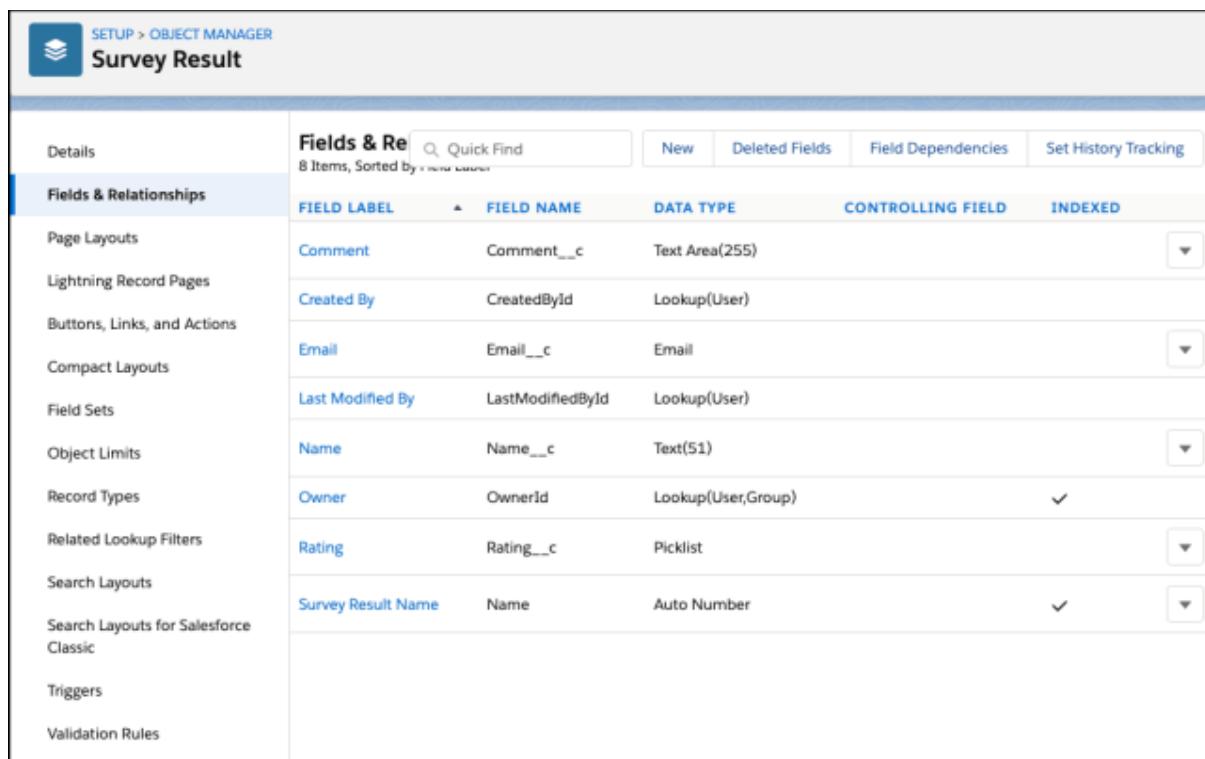

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

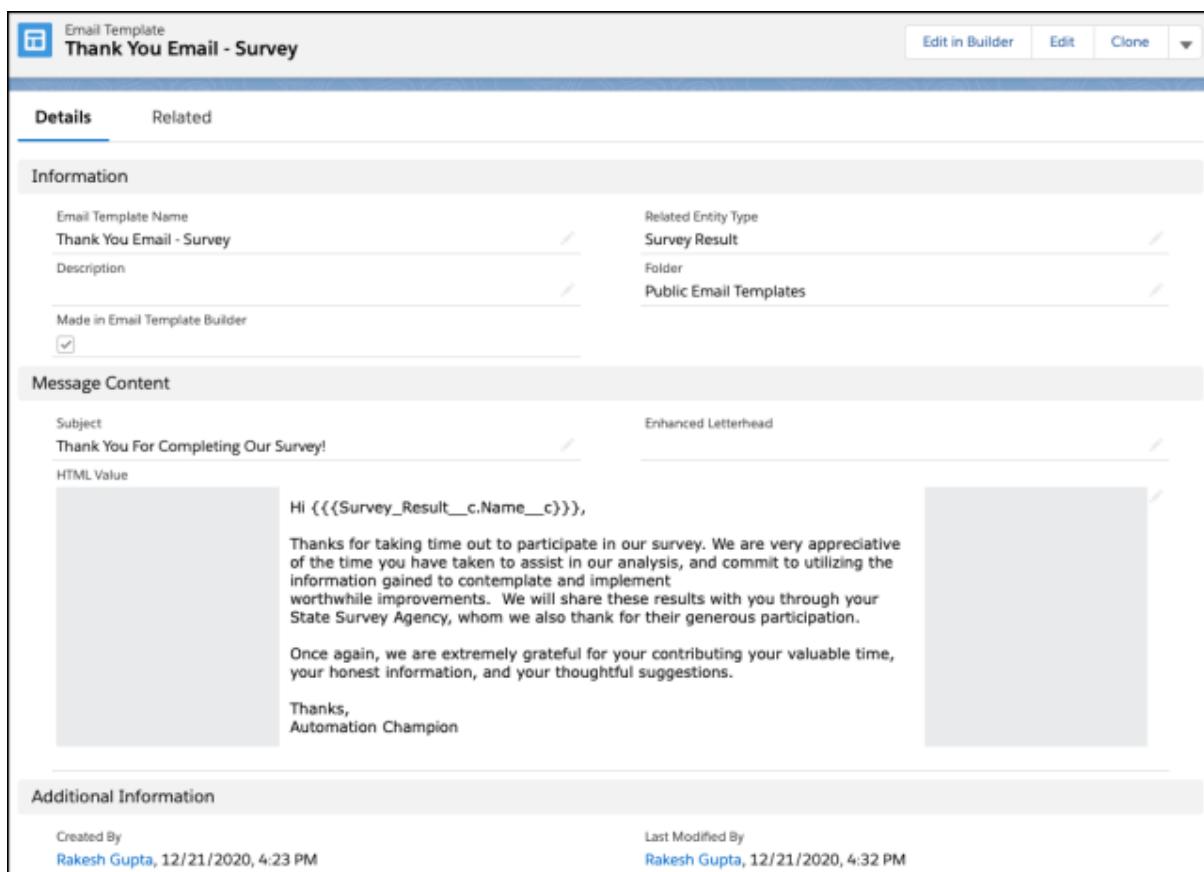

The screenshot shows the Salesforce Object Manager interface for creating a custom object named "Survey Result". The left sidebar lists various setup categories like Details, Fields & Relationships, Page Layouts, etc. The main area is titled "Fields & Relationships" and displays a table of fields. The table has columns for FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Comment	Comment__c	Text Area(255)		
Created By	CreatedById	Lookup(User)		
Email	Email__c	Email		
Last Modified By	LastModifiedById	Lookup(User)		
Name	Name__c	Text(51)		
Owner	OwnerId	Lookup(User,Group)		✓
Rating	Rating__c	Picklist		
Survey Result Name	Name	Auto Number		✓

Step 2: Create a Thank You For Survey Lightning Email Template

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. **Name the Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

Step 3: Create an Email Alert

1. Click **Setup**.
2. In the Quick Find box, type **Email Alerts**.
3. Select **Email Alerts**, click on the **New Email Alert** button.
4. **Name the Email Alert** and click the Tab button. The **Unique Name** will populate.
5. For **Object** select **Survey Result**.
6. For the **Email Template** chooses **Lightning Email Template Thank You Email – Survey**.
7. For **Recipient Type** select **Email Field: Email**.
8. Click **Save**.

Edit Email Alert
Survey - Thank You Email

Create an email alert to associate with one or more workflow rules, approval processes, or entitlement processes. When changing an email alert, any modifications will apply to all rules, approvals, or entitlement processes associated with it.

Email Alert Edit

Email Template Thank You Email - Survey

Protected Component

Recipient Type Search: User for: Find

Recipients	Available Recipients	Selected Recipients
	User: Integration User User: Rakesh Gupta User: Security User	Email Field: Email
	Add Remove	

You can enter up to five (5) email addresses to be notified.

Additional Emails

From Email Address Current User's email address

Make this address the default From email address for this object's email alerts.

Save Save & New Cancel

Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey

1. Click **Setup**.
2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
 1. **How do you want to start building: Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

Step 4.2: Salesforce Flow — Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.
4. For **How to Set the Record Fields** – select **Use separate resources, and literal values**.
5. Select the **Survey_Result__c** object from the dropdown list.
6. **Set Field Values for the Survey Result**
 1. Row 1:
 1. **Field: Comment__c**
 2. **Value: {!Comment}**

2. Click **Add Row**
 3. Row 2:
 1. **Field: Email__c**
 2. **Value: {!Email.value}**
 4. Click **Add Row**
 5. Row 3:
 1. **Field: Name__c**
 2. **Value: {!Name.firstName} {!Name.lastName}**
 6. Click **Add Row**
 7. Row 3:
 1. **Field: Rating__c**
 2. **Value: {!Rating}**
7. Click **Done**.

Step 4.3: Salesforce Flow — Call an Action — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.
4. Clicks on the **Survey – Thank You Email** email alert.
5. Click **Done**.

Edit "Survey - Thank You Email" email alert

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

Label	API Name
Send Thank You Email	Send_Thank_You_Email

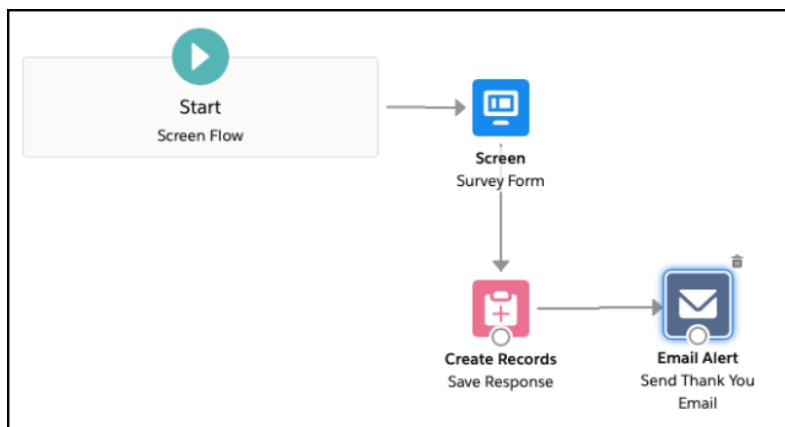

Description

Set Input Values

A_a Record ID	{!Save_Response}
----------------------	------------------

Cancel **Done**

In the end, Sergio's **Flow** will look like the following screenshot:

1. Click **Save**.
2. Enter **Flow Label** the **API Name** will auto-populate.
3. Click **Show Advanced**.
4. **How to Run the Flow: User or System Context—Depends on How Flow is Launched**
5. **Type: Screen Flow**
6. **API Version for Running the Flow: 51**
7. **Interview Label: Survey {!\$Flow.CurrentDateTime}**
8. Click **Save**.

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [GitHub](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce Developer Console interface. The top navigation bar includes File, Edit, Debug, Test, Workspace, Help, and tabs for < >. A tab labeled "VFPPageToLC.app *" is active. The main area contains the following code:

```
1 <aura:application access="global"
2           extends="ltng:outApp"
3           implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

At the bottom of the screen, there is a blue footer bar with the text "Logs, Tests, and Problems" and a small icon.

Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the `<apex:includeLightning/>` component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the component on the page using `$Lightning.createComponent()`. Click **Setup**.

1. In the Quick Find box, type **Visualforce Pages**.
2. Clicks on the **New** button.
3. Copy code from [GitHub](#) and paste it into your visualforce page
4. Click **Save**.

The screenshot shows the Visualforce Page Editor for a page named 'Survey'. The 'Page Information' section includes fields for Label ('Survey'), Name ('Survey'), and Description. It also has checkboxes for 'Available for Lightning Experience, Experience Builder sites, and the mobile app' (checked) and 'Require CSRF protection on GET request' (unchecked). The 'Visualforce Markup' tab displays the following Apex code:

```

1 <apex:page showheader="false" lightningStylesheets="true">
2 <html>
3   <head>
4     <apex:includeLightning />
5     <!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualf
6   </head>
7   <body class="slds-scope">
8     <div id="flowContainer" />
9     <script>
10       var statusChange = function (event) {
11         if(event.getParam("status") === "FINISHED") {
12           var outputVariables = event.getParam("outputVariables");
13           var key;
14           for(key in outputVariables) {
15             if(outputVariables[key].name === "myOutput") {
16               ...
17             }
18           }
19         }
20       };
21       $Lightning.use("c:VFPageToLC", function() {
22         $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
23         "flowContainer",
24         function (component) {
25           component.startFlow("Survey");
26         }
27       });
28     </script>
29   </body>

```

Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.
2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

The screenshot shows the 'Site Edit' screen for a site labeled 'Survey'. The site has the same name 'Survey' for both 'Site Label' and 'Site Name'. The 'Site Description' field is empty. The 'Site Contact' is listed as 'Rakesh Gupta'. The 'Default Record Owner' is also 'Rakesh Gupta'. The 'Default Web Address' is set to <http://katihar-developer-edition.gus.force.com/>. The site is marked as 'Active' with a checked checkbox. The 'Active Site Home Page' is set to 'Survey' and has a preview link. The 'Inactive Site Home Page' is set to 'InMaintenance' and also has a preview link. The 'Site Template' is 'SiteTemplate'. The 'Site Robots.txt' and 'Site Favorite Icon' fields are empty. The 'Analytics Tracking Code' and 'URL Rewriter Class' fields are also empty. Under the 'Enable Feeds' section, there is an unchecked checkbox. The 'Clickjack Protection Level' is set to 'Allow framing by the same origin only (Recommended)'. The 'Require Secure Connections (HTTPS)' and 'Lightning Features for Guest Users' checkboxes are checked. The 'Upgrade all requests to HTTPS' checkbox is checked. The 'Enable Content Sniffing Protection' and 'Enable Browser Cross Site Scripting Protection' checkboxes are checked. The 'Referrer URL Protection' and 'Guest Access to the Payments API' checkboxes are unchecked.

Under site, **Public Access Settings** make sure that guest users have **Create** access on **Survey Result** object and **Edit** on the fields.

Proof of Concept

Now onward, if someone opens the site url and fills the form:

Survey

Name

First Name
Alok

Last Name
